July 12 1936

we saw a number of Amphibolurus in the scrubland & some  
large Lacertilia in the same area. We also found a few small lizards  
near the water hole. The most interesting find was a large  
“Iguana” by the water hole. It was about 18 inches long.  
The lizard was found in the scrubland & was probably  
the Cordylus cordylus of Ward & Hottentot. We also found a few  
small lizards that were very similar.
